

Predator CNC Editor™ - Teksoft Upgrade

Why upgrade from the Teksoft version to the full-blown Predator version?

This paper outlines the specific features and benefits of upgrading from the Teksoft version to the full-blown Predator version of the Predator CNC Editor. The current release is v6.1 and the following major features justify upgrading:

1. Color Syntax Highlighting
2. 3D Animation Style Backplotting
3. Expanded support for RS-232 COM Ports
4. Optional Software Maintenance
5. Trade in/Upgrade to Predator DNC, Desktop, MDC, or Virtual CNC

The really good news is that Teksoft users can receive a \$100 discount when upgrading. So instead of a \$500 purchase it is only a \$400 upgrade. Annual software maintenance is only \$75 per year.
