SHOP FLOOR AUTOMATIONS OFFERS MANUFACTURERS WEB TRAINING FOR DNC ADMINISTRATOR AND CNC EDITING

La Mesa, California – March 24, 2009 – Shop Floor Automations (SFA), the largest reseller and support leader for Predator Software, announces web based training classes for Predator DNC and CNC Editor.

SFA offers a variety of one hour web based classes to help manufacturers master the Predator Software products they use. The training focuses on how to save time and automate processes. It also features system functionality and benefits for a manufacturer's current system – from the basics to the most advanced features.

Training is available every month for DNC Basic, DNC Advanced and CNC Editor. Training for other Predator Software products, SFA's own Logic Builder Enterprise software, and SFA's Real Time Viewer is available on request.

"These classes are particularly timely given the new release of version 8 of Predator products," said Greg Mercurio, President of SFA.

Manufacturers who do not currently use Predator or SFA software are still welcome to participate in the training. A current training calendar is always available at this web location:
