

Multi Connect Sneak Peek

Five Ways. One Device!

Thank you for your interest in the Multi Connect from Shop Floor Automations. This upcoming 2017 release is brought to you by SFA in partnership with Moxa, and while the more in-depth product information is being held for when this item is on sale, here is some exclusive, early information:

Sneak Peek

- Integrates with PLC, Wireless, Ethernet, RS232 & MTConnect
- Accomplishes what previously needed two devices combined
- Machine Monitoring & DNC possibilities
- Programmable, consolidating hardware
- Supports 802.11n wireless networking
- Small, compact – easy to mount
- Surprisingly affordable technology
- Ask us about when this is available!

Tech Data

MTConnect is the new industry standard for machine monitoring, and this device is a key component to making that happen for your older pieces of equipment. The built-in MTConnect technology in the Multi Connect allows for easy monitoring of your equipment.

Managers and key personnel can have access to live machine data at their fingertips. Live dashboards and phone apps can be used to view your shop and obtain valuable information. Don't forget to ask SFA about a full line of software solutions that complement the Multi Connect device!

The Wired or Wireless connection is also built into the Multi Connect to allow for seamless integration to your company network. A standard IP address is programmed into the unit and easily attached to your network for both data collection and/or DNC communications.

Call 877-611-5825 or visit ShopFloorAutomations.com for solutions that fit your individual shop floor needs. You can also check out SFA on Twitter at @SFA_inc as well as Facebook by searching for "shop floor automations".
