

WHAT IS SCYTEC E-LEARNING?

Scytec provides online courses to learn how to fully utilize DataXchange machine monitoring features. From data reporting options, to installation, to modifying existing data, and beyond, E-Learning insures you get the most of DataXchange!

Configuring Reporting Options

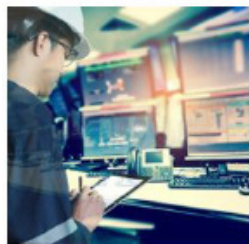

Configuring Shift Options

DataXchange Installation

COURSES TO TAKE:

- Configuring Reporting Options
- Shift Options
- DataXchange Installation
- Initial Configuration
- Modify Existing Machine Data
- System Administration
- Understanding Data Sources

Initial DataXchange Configuration

Modifying Existing Machine Data

System Administration

HOW IT WORKS:

A subscription to the E-Learning platform will provide customers unlimited access for 12 months to an online portal of topic-based training videos. Each course is structured with multiple video lessons. Quizzes at the end of each course ensure that the most important pieces of information were captured.

Understanding the different Data Sources

BENEFITS:

Help employees learn about DataXchange on their schedule. Courses can even be taken over again if a refresher on the software is needed. Log in to E-Learning anywhere, anytime. This is especially useful for second and third shift personnel.

New videos and courses are added frequently. There is always something new to learn about DataXchange, no matter your role in the manufacturing process.

READY. SET. GO.

After you finish these courses, you will understand how to fully take advantage of Scytec DataXchange machine monitoring software. How to set up the software, how it works, and how to collect as well as understand this crucial data.
