

Predator CNC Editor™ – Feature Grid

Feature grid by product license

Abstract

This paper outlines the specific features within Predator CNC Editor. Predator CNC Editor is licensed four ways: Enterprise, Editor, Express, and Light. Each Predator CNC Editor license can be customized to address the unique requirements of each manufacturer.

- Predator CNC Editor Enterprise is designed for CNC programmers, machinists, manufacturing engineers, shop floor personnel and users that need to work with CNC programs within large organizations or those that require security or integration with Oracle and Microsoft SQL Server.
- Predator CNC Editor is designed for CNC programmers, machinists, manufacturing engineers, shop floor personnel and users that need to work with CNC programs.
- Predator CNC Editor Express is designed for CNC programmers, machinists, manufacturing engineers, shop floor personnel and users that need to basic editing tools with basic DNC communications.
- Predator CNC Editor Light is a free edition.

Predator CNC Editor is bundled with Predator DNC Express, DNC and DNC Enterprise. The bundled version includes all features of the stand-alone edition less all DNC features.

The OEM version is sold and supported by the OEM. The feature set that is included with the OEM version varies by OEM. For additional details contact the appropriate OEM. This paper focuses on the feature set available from Predator Software Inc.

Predator CNC Editor is a member of a suite of applications all designed to share common data and components. They all share a common design and philosophy based on our unique understanding of manufacturing processes. Collectively they are known as Predator SFC™.

This document is based on features in Predator CNC Editor v11.0.

NOTE: It is not possible to list every individual feature contained within Predator CNC Editor. The intent of the above table is to determine the capabilities of each module within the Predator CNC Editor family. Demo Versions are also available.

One of many

Predator CNC Editor is a stand-alone application built on Predator's common platform. This common platform is a shared foundation to an entire suite of Predator applications. Shared common data improves overall productivity and minimizes implementation time when adding additional applications.
