

FLOPPY DRIVE EMULATOR

ELIMINATE 3.5 INCH FLOPPY DISKS

BENEFITS:

- Plug-and-play installation
- Eliminate 3.5" floppy disk
- 720K/1.44MB IBM format
- Compatible with most CNC's
- Requires no firmware changes
- Easy to use and operate

The USB floppy drive emulator from Shop Floor Automations will replace your existing floppy drive (example below) with an independently operated USB flash drive reader. No additional changes to your system are needed, besides removing the existing drive and replacing it with this drive. Easy installation with no system configuration or debugging required.

The drive emulates your existing floppy drive in order to replace the original with a USB port. This drive replaces most existing 720k/1.44MB capacity 28 or 34 pin ribbon cables systems available and will connect to your existing power and data cables. Works with CNC machinery (Haas, Centroid, Robots, Flame Cutters, Greco Disks) or devices that still use floppy drives. This device completely replaces the 3.5" floppy drive of any floppy-equipped system.

Be sure to contact us with your control information - it is likely our device is compatible!

ADDITIONAL BENEFITS:

- Low cost investment
- Eliminate hard to find floppy disk media
- Improves reliability transferring from USB memory key
- Supports variety of CNC controls & industrial equipment
- Telephone support included
